- Hub Signage with information on routes and QR code to more detail
- Bicycle Repair Station

### MERRIJIG – SCHOOL LANE

- Hub Signage with information on routes and QR code to more detail
- Bicycle Repair Station

### Signage and Safety

Hub signage: Located at each hub, providing information on routes and QR code to more detail. Some typical examples are provided below, with the information on Mansfield Shire's routes to be added.

Fingerboards: Directional signage located on the easy loop (Black Swamp Loop). Example signage provided below, with Mansfield Shire's information to be added.

Safety signage: In addition to the regular safety signage on all routes, to be identified in consultation with Council's Engineering and Field Services teams, it is proposed to install solar powered flashing light signage warning of shared use at the start and end of the expert ride on Howqua Track. This feature has been long sought after by the Howqua Hills Progress Association to warn inexperienced users of the track of the hazards that may be encountered on the road.
