## Explanatory Notes

### Purpose of this Policy and Procedure Manual

This Manual is incorporated by reference into the Community Local Law 2026 – 2035 and supports the Community Local Law by explaining the reasons behind certain controls that affect the Shire’s amenity. It outlines:

- How Council staff will administer these controls;
- How decisions are made; and
- The purpose of each clause.

### Ongoing Review

The Community Local Law review and community consultation process undertaken was extensive. This Manual:

- Supports the Community Local Law and provides procedures which can be updated by a Council resolution; and
- Reflects changing community needs and expectations.

Council intends to keep this Manual under continuous review with input from staff, management, community groups, and individuals affected by the Community Local Law.

### Exemptions

The Manual identifies exempt persons or activities.

Additional exemptions may be added by Council if the objectives of the Local Law are still met.

### Permits and Permission Tables

Permissions tables are included for all relevant Local Laws where permits may apply. These tables outline for tiers of control as follows:

#### Tier 0 - No Permit Required

Activities or uses specified in this section do not require any permission. They are considered to have little or no impact and do not need to be considered by Council. Activities or uses that do not meet the Conditions specified are to be included in the next section ‘*Permit by Notification*’.

#### Tier 1 - Permit by Notification

Activities or uses specified in this section require a permit to be issued. This process is a matter of the applicant completing an application and a permit will be issued automatically without consideration by Council. These activities or uses are considered to have some impact but must meet the Conditions specified to mitigate these impacts. These Conditions will be shown on any permit issued. Activities or uses that do not meet the Conditions specified are to be included in the next section ‘*Permit by Application*’.

#### Tier 2 - Permit by Application

Activities or uses specified in this section require a permit to be issued as they may have higher impact, that needs consideration by Council Officers. Council officers will use the appropriate Decision Guidelines to decide whether the proposal will produce acceptable outcomes in accordance with the purpose of the Community Local Laws. These decision guidelines are included in each procedure. Conditions to mitigate any impacts will be shown on any permit issued and may include conditions not listed in the table. Council may refuse to issue a permit

where impacts cannot be adequately mitigated. Activities or uses that do not meet the Conditions specified are ‘Prohibited’.

### Tier 3 - Prohibited

Activities or uses specified in this section are Prohibited. This will include any activities or uses detailed as Prohibited in the Community Local Law as well as any activities or uses which cannot meet the Conditions listed in the Permission tables.

### Enforcement

Decisions on different compliance responses will be undertaken in accordance with the Compliance Policy, and the following matrix applied:

		Severity of Offence			
		Negligible No impact to community or environment	Minor May have a minor impact on the wider community or environment.	Moderate Has a moderate impact on community or environment.	Major Has a major impact on the community or environment.

### Document control

The Policy and Procedure Manual is a controlled document, with the following controls in place:

1. One master document will be maintained by an authorised staff member.
2. Updates require Council authority.
3. Subject to internal audit.

## **Definitions**

Terms used in this manual align with the Definitions table in the Community Local Law document unless otherwise specified.

## **Commencement**

The operation of this Policy and Procedure Manual commences on 1 July 2026
