Q1. **Do you support proposed closure of High St Service Road?** No

Q2. **What concerns, if any, do you have about the proposal?**

Cannot see any benefits for the outlay...have never witnessed ski traffic using the service road...the benefits listed appear to concern a minority...if ,as I assume, you are still going to proceed then a designated widening turning zone into Station St should be included otherwise I can envisage chaos and not smoothly running traffic movement. Also parking for dental clients appears to have been overlooked unless the width of the road is dramatically increased.

Q3. **Please provide any additional comments:**

not answered

Q1. **Do you support proposed closure of High St Service Road?** No

Q2. **What concerns, if any, do you have about the proposal?**

The side road allows locals to turn down side road as has always been the case

Q3. **Please provide any additional comments:**

By closing the side road you will need a turning lane to access station st if turning left . Will this happen ??

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

None .. its a good idea

Q3. **Please provide any additional comments:**

Its safer It will provide future certainty for residents with respect to increased through traffic potential if the other side of Station Street becomes a high traffic volume site.

Q1. **Do you support proposed closure of High St Service Road?** No

Q2. **What concerns, if any, do you have about the proposal?**

The road should stay as it currently is. Our ratepayer money should be spent better, rather on improving roads than closing them. The closure could cause traffic flow issues with people getting caravans and boats stuck down there when they would be trying to head to the caravan park.

Q3. **Please provide any additional comments:**

Our town is growing, with more people moving here every week. Shouldn't we be opening up space and new roads rather than closing them?

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

not answered

Q3. **Please provide any additional comments:**

Closing the road will only affect a few driveways and the dentist has parking. I believe closing the road will stop people using this lane to jump traffic resulting in actually creating more chaos traffic.

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

that traffic runs smoothly, particularly since there will be a new service station so lots more traffic in an area that is already jammed up in winter. Residents should not be adversely effected.

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

None. It is a very positive, constructive way of Helping deal with the avalanche of traffic at this Busy section of road.

Q3. **Please provide any additional comments:**

The plan is a good one. The majority voice should be heard. A disgruntled resident, is not reason to not adopt this 2nd, better version of the plan.

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

nil

Q3. **Please provide any additional comments:**

The emerging traffic congestion in this area is extremely concerning. Closing the slipway will help protect the residents and businesses from increasing vehicle traffic.

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

My concerns are that something must be done urgently to manage traffic into the future and hopefully revised plan will help to do this.

Q3. **Please provide any additional comments:**

The traffic problems in the entrance to town and with increasing development of businesses that generate more traffic there is a greater need to find ways to limit and manage this. Residential streets such as Elvins and Station street need as much protection as possible to avoid visitor traffic doing "rat runs" to get out of gridlock.

IP Address: 1.145.73.111

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

Revised plan is preferred although future development on cnr of Station and High Street will further impact this intersection....is this also being factored into plans.

Q3. **Please provide any additional comments:**

not answered

Respondent No: 17

Responded May 15, 2026 09:57:29 am

At:

Last Seen: May 14, 2026 23:49:07 pm

IP Address: 1.146.84.13

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

The revised proposal looks more functional as the access to the affected properties is to Station street. The future development on the corner of Station Street and High street is still to be resolved. This will potentially impact on the proposal put forward.

Q3. **Please provide any additional comments:**

not answered

IP Address: 1.145.181.0

Q1. **Do you support proposed closure of High St Service Road?** Yes

Q2. **What concerns, if any, do you have about the proposal?**

Closure will assist future traffic management at the Station Street and highway (High Street) intersection

Q3. **Please provide any additional comments:**

The intersection of Station Street and High Street is already confusing and pedestrians from the Station who are trying to get to the cafe are confused at the flow of traffic suddenly appearing from Station Street and the service road
